

Specification for front entry door lock and handle set
Palm Colony

The original lock and handle set is from Schlage, in antique brass color. Some changes have been made to this handle set by the manufacturer. New and old parts are not interchangeable, so you must replace all of the hardware at the same time.

The current model is Schlage F62-PLY-GEO, Antique Brass, which has a keyed lock inside and outside for the deadbolt, with a round inside door knob. PLY is their Plymouth design on the outside, and GEO is their Georgian design on the inside. You can chose from many styles for the inside handle – knobs, levers, etc.

For a handle set with a keyed lock on only the outside, and a hand-operated deadbolt knob on the inside, use the F58-PLY-GEO model at: www.schlage.com.

These units have a limited lifetime mechanical warranty and a 10-year warranty on the finish.

The new handle set should fit in the existing door and frame openings, with two exceptions:

1. A 3/8" hole must be drilled through the door to fasten the bottom of the pull handle to the door.
2. The recess in the door frame for the deadbolt strike plate must be about 1/8" deeper if you use the extra reinforcement lock plate.

One source for these locksets is the website: handlesets.com There are many on-line sources. Lowe's and HOME DEPOT locally sell the handle sets.

NOTE: When you change your lock, remember to send a copy of your key to Alliant Property Mgmt.
